

23 % energy efficiency progress between 1990 and 2009 (1.4%/year) mainly due large electrical appliances (27% progress or 1.7%/y) and space heating (25% or 1.5%/y)

ODEX is an index weighting the energy efficiency progress gains of 8 end-uses/appliances : heating (toe/m²) water heating, cooking (toe/dwelling), refrigerators, freezers, washing machine, dishwashers and TV (kWh/year)
