

# Energy efficiency index (ODEX) for final consumers (EU-27)

- ODEX= 90 in 2009
- 10% energy efficiency improvement between 2000 and 2009 (or 1.2%/year)
- Larger gains for households (1.5%/year) and industry (1.3%/year)
- Lower progress for transport (0.9%/year)

◆ Industry    ■ Transport    ▲ Households (technical)    ● Total

ODEX is calculated as a 3 years moving average to avoid short term fluctuations (imperfect climatic corrections, behavioural factors, business cycles)...
