

- Large discrepancy in the specific emission of new cars among countries;
- Lower difference however as for the specific fuel consumption: range of 30% for CO<sub>2</sub> between Portugal and Sweden compared to 40% for the fuel consumption; 7 countries below 150 g CO<sub>2</sub>/km and 4 above 170 g CO<sub>2</sub>/km. In 2008 Portugal and France around 140 gCO<sub>2</sub>/km
